

Stop working harder.

Yupiik Unveils Meeecrogate: The All-in-One NO code API Platform

[Copenhagen, September, 19th 2023] – Yupiik, a French consultancy tech company known for its innovative and specialized solutions, is thrilled to announce at the DTW23-Ignite conference the launch of Meeecrogate, the revolutionary all-in-one NO code API platform. With Meeecrogate, organizations worldwide can now streamline their API creation, implementation, and monitoring processes, all from a single, intuitive and easy to use platform.

Meeecrogate: Simplifying the API Lifecycle through a NO code solution

APIs (Application Programming Interfaces) have become the backbone of modern business operations, driving digital transformation across industries. However, managing APIs efficiently can be a complex and challenging task, often leading to security vulnerabilities, operational inefficiencies and fragmented workflows.

Meeecrogate has been meticulously crafted to address these challenges, offering a comprehensive solution that simplifies the entire API lifecycle narrowing sensitively the time of implementation and critical business decision making. Indeed being a NO code solution allows every department to have access to the interface and manage the APIs accordingly to their business needs.

Key Features of Meeecrogate

Meeecrogate empowers organizations with a wide array of features and benefits:

1. **Effortless API production:** Meeecrogate provides a NO code intuitive and user-friendly interface, allowing users to seamlessly implement, secure and deploy APIs. Whether you're a seasoned developer, Integrator or a business analyst, Meeecrogate makes the process straightforward.
2. **Security First:** Security is a top priority with Meeecrogate. It offers robust authentication, authorization mechanisms, and state-of-the-art security

protocols to safeguard your APIs and data. With Meeecrogate, you can rest assured that your digital assets are protected.

3. **Business Oriented solution:** Meeecrogate abstracts technology complexity to end users so they can focus on business objectives related to data exposure and interconnections. Meeecrogate provides natively industry standards APIs to enable seamless connectivity and interoperability between organisations.
4. **Centralized Management and Empowerment:** Meeecrogate consolidates API management under one roof, eliminating the need for fragmented processes along with making every employee able to manage the workflow on its own avoiding the old-fashioned long development timing. It streamlines collaboration among teams, ensuring a cohesive and efficient approach to API management.
5. **Freedom to choose which infrastructure suits you best:** from legacy to Cloud, Meeecrogate is able to adapt to all organizations' needs and sizes. Being a Cloud agnostic solution allows any type of configuration.

A Game-Changer for Your Digital Strategy

Meeecrogate is set to redefine the way businesses approach API production, providing a unified solution that simplifies and secures the API lifecycle. With Meeecrogate, organizations can unlock the full potential of their digital ecosystems and stop working harder.

About Yupiik

Yupiik is a French Tech Consulting company with global reach. We are focused on IT infrastructure, architecture, operations, and overall technology strategy. We embrace technological co-discovery building capabilities, modernizing platforms, and creating a software engineering culture.
